

The Release of the Senate of the Hacettepe University Regarding Justice and Human Rights for Palestine on 20th May 2021

The blockade of Israel, which prevents the access of the Palestinian nation to the basic human needs, medicine and medical equipments, as well as electricity and water, is ongoing for years in front of the eyes of humanity. Israel, lastly, continues its attacks with increasing violence and without considering any humanitarian values, towards the Muslims that worship and towards their places of worship in Jerusalem, where there are holy places of three monotheistic religions. Israel is continuing unobtrusively increasing the cost of its humanitarian crime by launching missiles and bombs unproportionally on the people in Gaza, who are deprived of their basic needs by Israel.

It is an open humanitarian crime, committed by a nation, which was affected by “Genocide” and this nation is now suprisingly pursuing “genocide politics”, which does not recognize any humanitarian, legal and moral values, towards another nation. This is also against the basic principles of the Torah, which is the holy book of the Jews, that says “Don’t murder”, “Don’t steal”, “Don’t commit adultery”.

It is not possible to explain this genocide, which is pursued systematically as a state policy, in today’s civilization level that was achieved with very high costs by humanity. The attitude of the international organisations that were established in order to prevent these kinds of crimes, the European Union as well as the developed Western nations that apply double standards in face of such an oppression that is against basic human rights and freedoms as well as international law, is also worrying in terms of the future of world and the region.

We, as the Senate of the Hacettepe University, perceive it as an humanitarian task to invite:

The state of Israel to give up straching a stain of shame of being the impicator of “discriminatory and genocidal” policies on the history of its own nation and;

The United Nations, NATO, the European Union and other International Organisations, which claim to be responsible for the protection of the human wisdom in all occasions, to take effective and convincing steps and to stop this violence.

Hacettepe University will continue to stand next to the oppressed Palestinian nation in the future as up to now and to all the oppressed nations in the world with determination.

With our sincere respect to the public.
